Course Overview

This 2-day, hands-on WSQ course teaches participants to automate real business processes by combining Microsoft Power Automate flows with AI agents built in Microsoft Copilot Studio. Day 1 progresses from Forms-driven email, Excel, branching and approval flows to specialised IT and HR agents. Day 2 connects websites to HTTP-triggered agent flows and ends with a multi-timeframe finance-advisor capstone. Every topic follows a concept → demonstration → hands-on lab pattern; participants finish with working automations and sit the WSQ assessment at the end of Day 2.

Assessment

The summative WSQ assessment is taken on Day 2, 4:00 – 6:00pm, and is open book (slides, Learner Guide and approved materials only):

- Written Assessment (WA / SAQ) — 1 hour, 4:00 – 5:00pm. Open-ended short-answer questions testing the knowledge from Modules 1–3.
- Practical Performance (PP) — 1 hour, 5:00 – 6:00pm. Candidates build a working flow and agent, mirroring the hands-on labs.
- Assessment flow: TRAQOM survey (QR on the LMS) → Assessment digital attendance → WA then PP → submit answers on the LMS → sign the Assessment Summary Record.
- WSQ funding requires a minimum of 75% attendance AND a Competent (C) assessment outcome.
- Courseware and the assessment are on the LMS: <https://lms-tms.tertiaryinfotech.com/>

Formative assessment is continuous: each lab includes a Checkpoint that the facilitator verifies before the class moves on. Labs 8–10 progressively verify an ordinary HTTP flow, a deterministic agent flow, and a guarded prompt flow across Microsoft Teams and website channels.
